---

Hello Mark,

Thank you for your time this afternoon. As a follow up from our phone call, I have attached the **Open Forest Briefing for R6 LEO.pdf**. This briefing paper captures the high points I would hope to share with pilot forest LEO community prior to Nov. 1 (the start of the Christmas tree permit sales season for some R6 forests). While the briefing paper is 2 pages, I am certain I can concisely share the key points with LEOs in a 10min time frame on a Monday call.

I have also attached two items:

- Sample Permit
- Sample Rules (html file – I generated this from our testing site, this html file may redirect there, and may not work for you – let me know)

In addition to a conference call update – I am happy to also offer a demonstration of the site to the LEOs so that they have an understanding of what kind of information individuals are presented with prior to purchasing their permit, and after purchasing their permit. A virtual demonstration would require skype screen sharing. LEOs are also encouraged to connect with their respective Forest POC (listed in the briefing paper) for a demonstration from them if that is easier too. A demo usually takes about 15 minutes, and then there's usually some Q&A or discussion time on top of that.

<https://openforest.fs.usda.gov>

I cc'd Aaron Burk, who is our Product/Project Manager for his awareness.

Looking forward to hearing back on when would be the best time to provide and update and/or a demonstration of the site!

Thank you!!
