Open Forest Product Roadmap

Release Name	Status	Risk	Product Goals
Middle Layer API	Complete		• Build API that allows data to be passed to SUDS
Special Uses Intake Module	Complete		• Integrate Open Forest Data to Legacy SUDS (in Dev)
Christmas Tree Module	Complete		• Build workflows for paying for and printing Christmas Tree permits
MBS NF Special Uses in Beta	**In Progress**	Low	• Pilot forest can use the Open Forest system • Non-commercial & temporary outfitter guide permit types are in the Open Forest system
Christmas Tees in Pilot	**In Progress**	Low	• Pilot forests can use the Open Forest system • Christmas permits and all critical workflows are in the Open Forest system
MBS NF Special Uses in Production	**Committed**	Low	• Pilot forest can use the Open Forest system within the production environment • Non-commercial & temporary outfitter guide permit types are in the Open Forest system
Scale Up to Include Additional Forests	Forecast	Low	• Additional forests can use the Open Forest System
Allow More Permit Types	Forecast	TBD	• Expand Open Forest Capabilities to include additional permit types
On-Board Additional Forests	Forecast	TBD	• All National Forests can use the Open Forest System
Allow More & Extend Business Workflows	Forecast	TBD	• Provide the public with more flexible and online options for obtaining permits to use their public lands • Reduce the workload for employees involved in the permitting process, so they can spend their time better serving the public, the land, and the agency
SUDS Redesign Integration	Forecast	TBD	• Boundaryless information flow b/w Open Forest and next generation SUDS

In Progress Release Report

Release: MBS NF Special Uses In Beta

Delivery Date:

Desired:
August 31, 2018
Forecast:
August 29, 2018

Issues and Pull Requests:

Completed
16

Remaining
6

Total Scope:
66 Story Points

Completed
54

Remaining
12

Release: Christmas Tree in Pilot

Delivery Date:

Desired:
Nov. 2, 2018
Forecast:
Nov. 2, 2018

Issues and Pull Requests:

Completed
1

Remaining
8

Total Scope:
37 Story Points

Completed
2

Remaining
35

Critical Dependencies:

- Approved ATO
- USDA email
- Pay.gov
- Login.gov
- Transfer operations to USDA EAS
- Outreach and promotion

Terms:

Issues: Analogous to user stories. Documentation of software functionality. Work to be done.

Pull Requests: Code awaiting developer review that fulfill the requirements of issues in the product backlog.

Story Points: Scale of measure for work to be done.

Near-term Forecast

Release: Scale Up to Include Additional Forests

Features

- Public can submit non-commercial, temporary outfitter guide, and Christmas tree permits
- Online interaction between customers and USFS special use administrators for applying, review, and issuance of permits

Metrics

- Number of National Forests using the application
- Number of permits issues via Open Forest vs. current process
- Permit administration time saved
- Customer time saved

Key Activities

- Outreach and promotion
- On-board additional Forests to use Open Forest
- Research and design new features (user management workflows, enhanced site navigation, and reporting)

USDA Forest Service: Open Forest Project

Product Roadmap Wiki

MBS NF Special Uses in Beta Release Report (Project GitHub Repository)

Production-readiness for a closed beta of the Special Uses module with the Mt. Baker-Snoqualmie forest. Specifically, this milestone will achieve: * securing ATO (production-ready code and compliance) * improve data quality of applications * resolving most urgent UX issues

Start **Jul 26, 2018**   Desired end date **Aug 31, 2018**
